Subject: NBN in Stroud NSW

Good morning

We are in the Paterson electorate and are writing in relation to the NBN review currently underway.

We currently pay for mobile broadband which we require for part-time work which subsidises our self-funded retirement plan. While we require internet service we do not require the mobile function but are compelled to pay the additional costs because we do not have a landline onto our block.

We ask that Stroud be seriously considered in the NBN rollout as services are currently minimal but nonetheless required.

We would certainly be customers of the NBN if it was available.

Kind regards

A and J Nicholas
Stroud
