

Verbal submission from Daniel Vieira of greater Goulburn

Daniel Vieira,
Goulburn, NSW

Mr Vieira resides on a property 15 kilometres from Goulburn. He is forced to rely on satellite for his broadband service as there are no other options. Mr Vieira's experience is that the satellite service is slow, expensive and limited. With these limitations it is very hard and frustrating for him to undertake distance education given all the waiting involved. Another example is he has to wait for a long time if he wants to view a YouTube video.

Mr Vieira considers that he should be able to get a better broadband service in the greater Goulburn region.
